 - (i) the types of risks that a derivatives party should consider when making a decision relating to types of derivatives that the derivatives dealer offers, including, for greater certainty, the material risks relating to the type of derivatives transacted and the derivatives party's potential exposure under the type of derivatives;

- (ii) the material characteristics of the type of derivative, including, for greater certainty, the material economic terms and the rights and obligations of the counterparties to the type of derivative;
- (c) the following statement, or a statement in writing that is substantially similar:

“A characteristic of many derivatives is that you are only required to deposit funds that correspond to a portion of your total potential obligations when entering into the derivative. However, your profits or losses from the derivative are based on changes in the total value of the derivative. This means the leverage characteristic magnifies the profit or loss under a derivative, and losses can greatly exceed the amount of funds deposited. We may require you to deposit additional funds to cover your obligations under a derivative as the value of the derivative changes. If you fail to deposit these funds, we may close out your position without warning. You should understand all of your obligations under a derivative, including your obligations if the value of the derivative declines.

Using borrowed money to finance a derivatives transaction involves greater risk than using cash resources only. If you borrow money, your responsibility to repay the loan and pay interest as required by its terms remains the same even if the value of the derivative declines.”

- (2) Before transacting in a derivative with, for or on behalf of a derivatives party, a derivatives dealer must advise the derivatives party of all of the following:
 - (a) any material risks or material characteristics that are materially different from the risks or characteristics described in the disclosure required under subsection (1);
 - (b) if applicable, the price of the derivative to be transacted and the most recent valuation;
 - (c) any compensation or other incentive payable by the derivatives party relating to the derivative or the transaction.

Valuation reporting

- 21. (1) On each business day, a derivatives dealer must make available to a derivatives party a valuation for each derivative that it has transacted with, for or on behalf of the derivatives party and with respect to which obligations remain outstanding on that day.
- (2) At least once every 3 months, a derivatives adviser must make available to a derivatives party a valuation statement for each derivative that it has transacted for or on behalf of the derivatives party, unless the derivatives party requests the valuation statement be made available monthly, in which case the adviser must make available a statement to the derivatives party for each one-month period.

Notice to derivatives parties by non-resident derivatives dealers

- 22. A derivatives dealer whose head office or principal place of business is not in Canada must not transact in a derivative with a derivatives party in the local jurisdiction unless it has delivered to the derivatives party a statement in writing disclosing all of the following:
 - (a) the foreign jurisdiction in which the head office or the principal place of business of the derivatives dealer is located;
 - (b) that all or substantially all of the assets of the derivatives dealer may be situated outside the local jurisdiction;
